

CONSTRUCTION NOTICE

May 13, 2019

VIA HAND DELIVERY

Subject: **Construction – South End of S Mesier Ave
Utility Improvements Contract 4, Village of Wappingers Falls**

Dear Resident:

The Village of Wappingers Falls is performing water and sewer utility work at selected locations in the Village as part of Utility Improvements Contract 4. Active construction work for Contract 4 began in July 2018 and will be completed by the end of September 2019.

The Contractor for the Village of Wappingers Falls Utility Improvements Contract 4 is Argenio Bros Inc. KC Engineering is the Village Engineer. During construction, KC Engineering field personnel are present inspecting the work and assisting to minimize impacts to residents and businesses. Some interruptions will be unavoidable, such as, the work will produce noise, the road and sidewalk surfaces will be deteriorated, equipment and materials will be staged in the area, vehicle traffic will be temporarily reduced or limited, on-street parking will be prohibited, etc.

KC Engineering and Argenio Bros Inc will do our best to inform you of specific interruptions to your utilities or access restrictions. We ask for your cooperation and understanding during this time and apologize for any inconvenience that this may cause you.

Argenio Bros Inc is scheduled to construct sewer utility improvements on the south end of S Mesier Ave this spring, from Maple St to 325 feet north. **Sewer main replacement work will start on or around May 16 and is expected to continue for approximately 3 weeks.** Top course repaving will be completed in the summer.

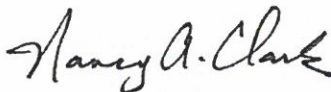

With the narrow streets, there may be times when you will not be able to directly access your home by car. If/when that happens, it will be for a short duration and we request that you seek alternative parking locations nearby.

If you have questions or concerns about this work, we recommend that you please speak with the Argenio Bros Inc. construction foreman or the KC Engineering on-site engineer / inspector at the site. Alternatively, you may contact the KC Engineering office at 845-471-7898.

Thank you for your patience as the Village advances construction of these improvements.

Sincerely,

KC Engineering and Land Surveying, P.C.

Nancy A. Clark, P.E.
Vice President
