Monitoring via the internet provides transmission of alarm signals at a much faster speed than standard telephone transmission. To ensure the integrity of the system, daily check-ins to our Monitoring Response Center are also provided.

When we receive an alarm signal, our Monitoring Response Center's "seasoned" personnel will dispatch the proper authorities to the exact area of alarm activation and notify personnel on your designated call list. Our Monitoring Response Center's personnel will then follow-up to verify the outcome of the alarm condition and report back to the client and our service department.

- *Total reporting zones* – all annunciating and reporting zones will be individually displayed at each command center and will also be reported to our Monitoring Response Center for custom reporting of individual zone.

FIVE DIAMOND CERTIFICATE:

DOYLE has been awarded The Five Diamond Certificate which is the highest certification that can be achieved in the alarm industry. The Five Diamond Certification, awarded by the Central Station Alarm Association, designates a higher level of performance than the industry standard for High Security Monitoring Centers. The industry standard is typically having a UL Listed Monitoring Response Center. The Five Diamond Certificate raises the performance standard to a higher level.

COMPLETION AND TESTING:

Upon completion we will test all devices for proper operation and for reporting to our Monitoring Response Center..
