

The board would like to address the recent report by the New York State Comptroller's office. We understand and share the community's concern over the findings in this report.

Since the State's most recent visit, a new treasurer has been hired. Our new treasurer has, in a few short months, been able to develop a good working relationship with the comptroller's office and is in regular communications with them. Due to this open line of communication, the State has been receptive and helpful, which is encouraging.

We would like our community to know that this board takes this report seriously. While we realize some of these issues have been years in the making, we also know that pointing fingers, assigning blame and looking backward is counterproductive. Regardless of how we got here, we know it is our job to make the changes necessary to move our village forward, and we are committed to doing so.
